

MASER

Manufacturing

Maser Australia's Cable Division is a **specialist** importer/distributor of high-quality cable and component products servicing the Commercial and Industrial sectors.

Maser excels in its ability to source and supply the most advanced and cost-effective products from key manufacturers worldwide. With a focus on **quality**, our suppliers are carefully selected to ensure access to the latest technology in cable design and construction. Our extensive range of products include Instrumentation and Control cables, Optical Fibre, Data and Communications, Industrial Ethernet, Automation and Building Management cables.

Our centralised sales & distribution facilities in Australia, New Zealand and the United Kingdom, provide direct access to a global supply chain, reducing our response times and effectively tripling our stock on hand.

Maser's **dedicated** team of professionals are **committed** to providing market leading products that exceed our customers' expectations. Combined with extensive industry **knowledge** and fast and **reliable** service, Maser has a proven track record as a **trusted** supply partner.

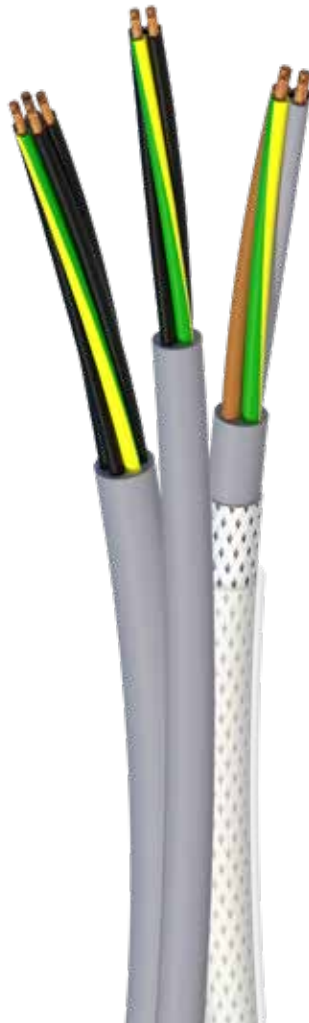

Maser Australia - Cable is a division of the **Maser Group**. Established in 1983, Maser Group is a trusted provider of advanced technology solutions across the Telecommunications, Enterprise, Industrial and Defence sectors.

Manufacturing Capabilities

For 30 years Maser have been supplying quality cable solutions to the Australian manufacturing sector where operational, control and automation systems require high levels of dependability and protection against electrical noise and interference. Maser pride ourselves in knowing what is required by your industry today, and what you will need tomorrow.

Maser have a range of cables available to meet all of the requirements of major plant and equipment associated with manufacturing. Maser also offer the design and manufacture capability of industry specific cables that can be tailored to individual needs.

Flexible Control

Maser can supply all the most popular flexible control cables in grey sheath, black numbered cores as well as shielded EMC cables with tinned copper braid shield and clear oversheath.

Data & Communications

Maser offer a range of RS-485, data and communications cables that are Green Star Compliant. We also offer Low Smoke Zero Halogen (LSZH) sheaths and some with SWA protection.

Industrial Ethernet

Maser have a number of ethernet cables that are designed to ensure that the communications get through not matter what the impediments are. Our Cat5e and Cat6 cable range includes variants such as fire rated, SWA, and underground gel filled. We also offer stranded and solid conductor cables.

U/UTP - Unshielded

F/UTP - Overall Foil Shielded

SF/UTP - Overall Foil + Braid Shielded

S/FTP - Overall Braid + Individual Shield

Automation Cable

The manufacturing world is full of automation and the Maser range of cables support Profibus, Profinet, ControlNet, Fieldbus, DeviceNet, Blue Hose and KNX protocols. At Maser we speak your language!

Instrumentation Cable

Maser supply instrumentation cables in 0.5mm² and 1.5mm² in multi pair and multi triad configurations, in individual and/or overall screened variants in black sheath or intrinsically safe blue sheath. These cables are also available in steel wire armoured (SWA) to ensure mechanical protection in harsh environments.

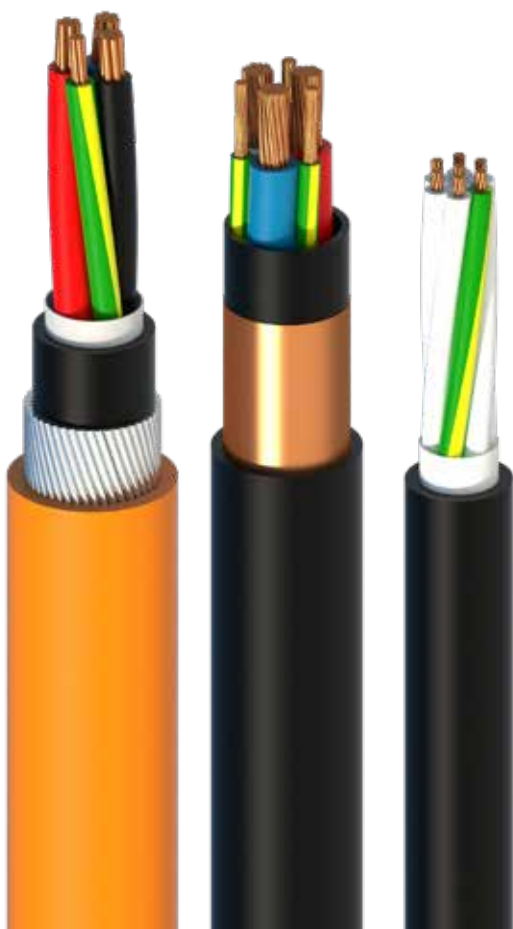

Adding value to your next project

Maser's capabilities extend far beyond the products that appear in this document. In addition to our extensive range of products, the professional team at Maser can assist with procurement, warehousing, logistical support and document control. Furthermore, with the support of our carefully selected manufacturing partners we can provide technical engineering support at the design stage of a project.

Power & Control Cable

Maser offer a range of power and control cables that are a vital ingredient in ensuring that the wheels of industry turn no matter what, even in the most hazardous conditions. SWA variants also provide additional protection where needed most.
