SECURE YOUR BUSINESS
WHEREVER IT TAKES YOU
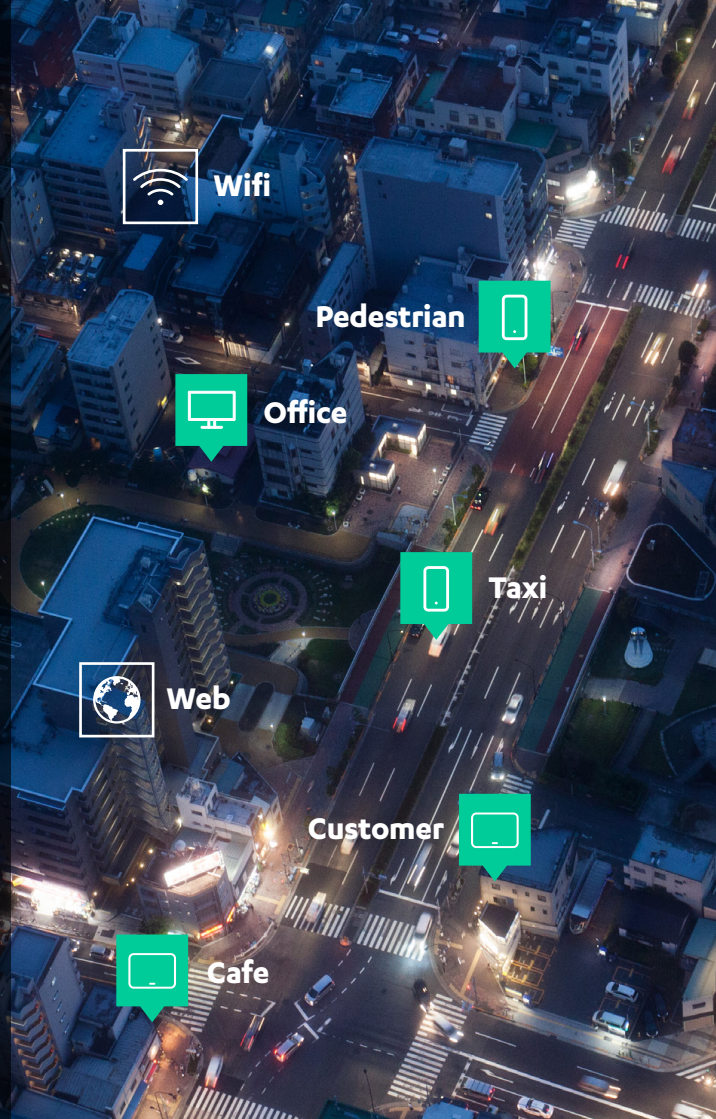

Protection Service for Business

F-Secure®

IT'S A MOBILE
WORLD

Today, we use more devices over more connections than ever before. Choosing when, where and how to work is not only convenient— it's also highly productive.

But more devices and more software also means more attack vectors and vulnerabilities. With attacks growing in sophistication and doubling in number each year, it's hard to stay on of top of cyber security. And a less well-defined network perimeter brings its own challenges, including decreased visibility.

Yet security is not part of your core business. You have other pressing issues, limited time, and limited resources. In the face of these challenges, how do you manage and secure everything?

Don't stress. We will solve your security needs—the smart way.

LEADING ENDPOINT
SECURITY

Protection Service for Business is one of the world's leading multi-endpoint security solutions, designed to solve complex security needs as easily as possible.

It is the only unified security solution that delivers centrally managed computer, mobile and server security, with integrated patch and mobile device management.

We are proven by independent security experts to provide superior*and more consistent protection than our competitors - thanks to our pioneering security technologies, like F-Secure Security Cloud.

You don't need to invest in server hardware. Nor do you need to procure, set up or maintain multiple products to secure your business. This allows you to ensure complete endpoint security with fewer resources and without straining your security budget.

You build your business. We'll protect it.

*AV-TEST: BEST PROTECTION 2011-2014
*AV-COMPARATIVES: TOP RATED 2010-2014

PROTECTION SERVICE
FOR BUSINESS

MANAGEMENT PORTAL

Central management portal for deployment, management and monitoring.

- Integrated mobile fleet management
- Automatic patch management
- No need to buy or maintain hardware

SERVERS

Comprehensive server security for Windows, Linux and Citrix.

- Additional SharePoint & Exchange components
- Advanced behavior & heuristic analysis
- Fully integrated patch management

MOBILES

Next generation mobile security for iOS and Android devices.

- Personal VPN (Wifi Security)
- Proactive App and Web protection
- Integrated mobile device management with anti-theft

COMPUTERS

Award-winning security for Mac & Windows.

- 4x winner: AV-TEST Best Protection
- Advanced behavior & heuristic analysis
- Fully integrated patch management

COMPLETE
BUSINESS PROTECTION

ACHIEVE SECURITY

- **Protect** all your end-points, from computers to mobiles and servers
- **Block** even advanced and zero-day attacks with DeepGuard
- **Patch** exploitable vulnerabilities caused by missing security patches
- **Prevent** harmful scripts, malware and improper content during web browsing
- **Filter** spam, phishing and malicious email attachments
- **Protect** against globally emerging malware within 60 seconds
- **Ensure** security with multiple layers of complementary technologies
- **Gain** real-time threat intelligence via the F-Secure Security Cloud

ENSURE CONTROL

- **Manage** the security of all endpoints from one management portal
- **Monitor** the security status of your whole IT environment, including mobiles
- **Automate** 3rd party security patching as well as product & database updates
- **Define**, distribute and enforce individual/group policies
- **Minimize** system impact, keeping everything fast and efficient

GET MORE.
DO LESS.

GET MORE FOR YOUR BUDGET

Consolidating endpoint security and vital tools like patch management into one solution enables you to do get more for your security budget and do less: there's no need to procure, set up or maintain multiple products to get what you need.

SWITCHING IS PAINLESS

You don't need to buy or set up server hardware, and with remote deployment and automatic removal of old anti-virus software, installation couldn't be simpler. AV- Comparatives found our endpoint installation **"no more complicated than installing iTunes."**

LESS MAINTENANCE

With a clean, task-oriented management console, all tasks from deployment to monitoring are fast and easy to perform. With automated 3rd party security patches, automatic client updates and real-time threat intelligence, you can spend less time with security maintenance.

TRUST
THE EXPERTS

F-Secure solutions consistently receive top honors in independent security evaluations. That includes winning AV-TEST's Best Protection Award—four years in a row.

The way we see it, winning one year could be luck. Winning two years is a good sign. **Winning four years in a row proves category dominance.**

| 2011 | 2012 | 2013 | 2014 |

We are able to deliver the highest standard of security day-after-day by the combination of pioneering technologies like heuristic and behavioral analysis, and by leveraging big data analytics and real-time threat intelligence via the F-Secure Security Cloud.

With us, you're at the forefront of security.

THIS IS F-SECURE

F-Secure is a European pioneer in cyber security and data protection.
We have been helping businesses solve security challenges for over 25 years.

Our award-winning solutions go far beyond traditional anti-malware. We
offer modern, best-in-class endpoint protection, security management, and
network security solutions. Developed in close cooperation with industry
partners and international security authorities, our solutions garner global
awards from leading independent experts.

Together with our network of over 200 operators and thousands of
IT service partners, we are able serve millions of private and business
customers locally, worldwide.
